Required Qualifications:
- University Degree in Computer Science, Software Engineering or a related discipline
- Customer-service skills and the ability to handle the fluctuating demands of multiple customers
- Quick learning ability is required as well as teamwork
- Excellent communication skills in English both verbally and in written form
- Availability to travel abroad
- Male candidates should have their military obligations fulfilled.

Main Responsibilities:
- Installation, Setup, Configuration & Consulting services to Maritime ERP projects
- Translate business requirements into ERP functional and configuration requirements
- Participate in analyzing customer needs and identifying opportunities for improvement
- Provide product / customer support of our Maritime ERP
- Perform testing and documentation of the Maritime ERP software
- Provide user training to customers
- Perform data mapping and migration when required
- Creating new reports and forms

Counted as advantages:
- Work experience in software application implementation
- Knowledge of Dynamics 365 Business Central
- Experience in the use of the SQL language

Compensation and Benefits:
The Company offers an attractive salary and very good career prospects within a dynamic organization with leading position in the vertical market and ambitious expansion plans.
