

Power Safety Officer (PSO)

On-site - Heraklion, Crete, Greece Operations & Maintenance - Full time

Description

Victus Networks is seeking a candidate to fill the role of **Power Safety Officer (PSO) in the Island of Crete, Greece**, particularly in Heraklion, in our newly deployed **Cable Landing Station in Tympaki**.

As a PSO, you will play a crucial role in ensuring the operational integrity and safety of our Telecom Data Centre suite.

The responsibilities of a Power Safety Officer encompass a wide range of operational and maintenance tasks, guaranteeing the seamless functioning of the Cable Landing Terminal Station and Landing Station Electromechanical Infrastructures. You will be at the forefront of ensuring minimal network incidents by proactively managing power feeding equipment, conducting routine inspections, and implementing optimization strategies to enhance system reliability. Your role will also involve coordinating with various parties to facilitate service interconnections and responding to emergencies with 24/7 availability.

Cable Landing Terminal Station Support:

- Minimizing network incidents through proactive management.
- Ensuring contractual service levels and safety regulations are met.
- Coordinating service interconnections and preventive routines.
- Managing corrective maintenance and troubleshooting.
- Maintaining accurate records and documentation.

Landing Station Electromechanical Infrastructures Support:

- Proactively managing electromechanical infrastructure.
- Ensuring contractual service levels and safety regulations are met.
- Conducting routine inspections and preventive maintenance.
- Managing corrective maintenance and troubleshooting.
- Maintaining accurate records and documentation.

Exclusive Duties & Qualifications on PFE systems:

- Safeguarding staff safety through expert operation and maintenance of Power Feeding Equipment.
- Monitoring and interpreting system alarms and performance data.
- Performing line supervision activities and detecting electrical faults.
- Managing routine maintenance and system configurations.

Requirements

- Bachelor's degree in electronic/Electrical Engineering

- 2 years of experience in the telecom and fiber optic domain
- Proficiency in digital and optical transmission techniques
- Strong knowledge of elementary electrical laws and computer operations
- Fluency in English, both written and spoken
- Valid driving license
- Excellent organizational and communication skills
- Proficiency in fiber optic software tools
- Experience with telecom and fiber optics domain
- Ability to multitask and manage partnerships effectively.
- Strong time management skills and cooperative spirit

Benefits

What We Offer

-  Competitive compensation plan
-  Private health insurance plan & bi-annual check up
-  Mobile phone & unlimited data and calls!
-  Cutting-edge training on-the-job and in our virtual classroom
-  A buddy will support you with your onboarding
-  A great opportunity to grow and work with a team of telecom experts
-  An amazing company culture that encourages technical brilliance, collaboration, respect and fun!
